

## Full-Service GI CRO

### End-to-End Clinical Trial & Imaging Services

Partner with us for stronger trial design, consistent clinical data, and superior trial management—driving better outcomes. **GI is our WHY.**

## Driving Excellence in GI Clinical Trials

**Alimentiv** is a specialized GI CRO with over 30 years of experience advancing clinical trials and gastrointestinal research. With a comprehensive suite of clinical trial management, medical imaging, and precision medicine services, Alimentiv partners with pharmaceutical and biotech companies to accelerate programs with confidence.

## Full-Service Expertise

At Alimentiv, we are committed to excellence in clinical trial management and advancing therapeutic innovations for GI diseases.

## Why Alimentiv?

- 30+ years of experience
- Trusted for >70% of IBD compounds in development
- 5,000+ global sites in 60+ countries for rapid activation
- 200+ peer-reviewed publications in the last five years

## Setting the Gold Standard for Imaging Endpoints

In 2007, Alimentiv pioneered central imaging for IBD studies, developing the first central image management solution for scoring of endoscopy videos.

# We Don't Just Run Trials We Advance the Science Behind Them

For decades, Alimentiv has led academic research and multi-center clinical trials—shaping trial design and advancing the management of chronic inflammatory diseases, especially IBD.

## Medical R&D Expertise:

- Development of novel outcome measures
- Design & conduct of Alimentiv-sponsored studies
- Publication & presentation of research findings
- Active participation in scientific consortiums
- Leading and participating in advisory boards
- Clinical trial fellowship programs

## Expertise Across GI & Liver Indications

Comprehensive solutions for global trials across all phases

- **Inflammatory bowel disease (IBD):** Ulcerative colitis (UC) and Crohn's disease (CD), fibrostenosing Crohn's disease, pouchitis
- **Eosinophilic gastrointestinal diseases (EGIDs):** Eosinophilic esophagitis (EoE)
- **Microscopic colitis**
- **Celiac disease (CeD)**
- **Functional and motility disorders of the gastrointestinal tract:** Gastroparesis
- **Familial adenomatous polyposis (FAP)**
- **Inflammatory liver conditions:** Primary sclerosing cholangitis (PSC), primary biliary cholangitis (PBC)

## Clinical Trial Services

Tailored solutions across all phases, backed by deep GI expertise and a global site footprint

### Study Design & Planning

- Trial Design & Protocol Development
- Feasibility & Site Selection
- Risk Management

### Regulatory & Start-Up

- Regulatory & Ethics Submissions
- Study Start-Up
- Medical Writing

### Project & Site Management

- Project Management
- Monitoring & Site Management
- Drug Accountability
- Clinical Logistics

### Data & Technology

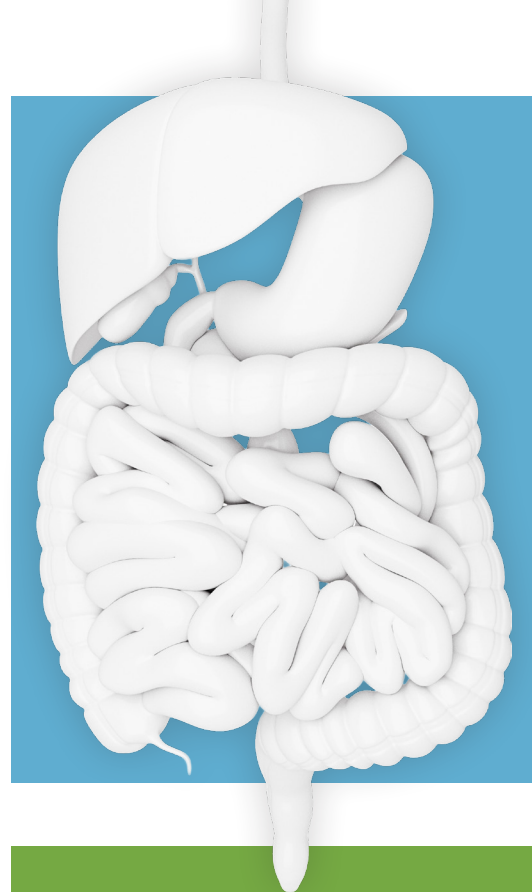

- eCRF Design & Data Management
- Analytics & Data Visualizations
- Data Monitoring Committee

### Medical & Imaging

- Medical Imaging
- Medical Monitoring
- Clinical Safety Management
- AI Solutions for IBD trials

### Quality & Compliance

- Risk-Based Quality Management
- Quality Assurance & Site Audits
- TMF Operations

## Accelerating Time to Market & Reducing Patient Burden

By combining deep GI expertise, innovative **endpoints**, and seamless global execution, we help sponsors **accelerate** development to bring better **outcomes** for patients sooner.

20% Fewer  
Non-Screening  
Sites Lead to

Recruitment**

# Imaging & Central Reading Expertise for GI Clinical Trials

Endpoints you can trust start with expertise you can rely on. Alimentiv is an industry-leading provider of imaging solutions for clinical trials in IBD and GI-related diseases—delivering accuracy, consistency, and scientific rigor across global studies.

## Central Reading Expertise Delivering Reliable Results

Our unique **Central Reader Training Program** ensures unbiased, standardized assessments by expert GI specialists. Our readers are practicing GI clinicians, KOLS and researchers selected for disease-specific expertise.

## Imaging Technologies

- **Noto™** – Proprietary software solution for image review, central reader scoring workflow, and data capture for endoscopy, histology & DICOM.
- **Lucidity™ Histopathology** Proprietary integrated biopsy sample management solution designed for secure and compliant handling of whole-slide images.
- **CIMS™ Plus HD** – The most widely recognized HD video capture for global UC and CD trials.
- **DOVAVision™ & PathwaysGI** AI solutions for enhanced endoscopy scoring for UC.

## Cutting-Edge GI Precision Medicine

### Specialty Histopathology Laboratory and Translational Research from AcelaBio

World-class GI histopathology services through AcelaBio, our dedicated specialty laboratory for biopsy processing and tissue analysis. High-quality tissue sections are the foundation for reliable imaging endpoints and biomarker discovery.

## Other Services

- Immunostaining & Digital Image Analysis
- Advanced AI-Powered Algorithms for Digital Image Analysis
- Spatial Biology Platforms
- Bioinformatics & Data Analysis
- Translational Research & Lab Services

AcelaBio is CAP/CLIA and 10x Genomics-certified for spatial biology

## A Full Suite of Imaging Modalities:

- Endoscopy
- Histopathology
- Magnetic resonance enterography (MRI/MRE)
- Intestinal ultrasound (IUS)
