

Accelerate Your GI Clinical Trials

Alimentiv CIMS™ Endoscopy Solutions

CIMSPlus™

Our comprehensive technology platform is designed to streamline and enhance the data acquisition, management, and assessment of endoscopic videos, while offering an industry-leading high-definition video capture solution.

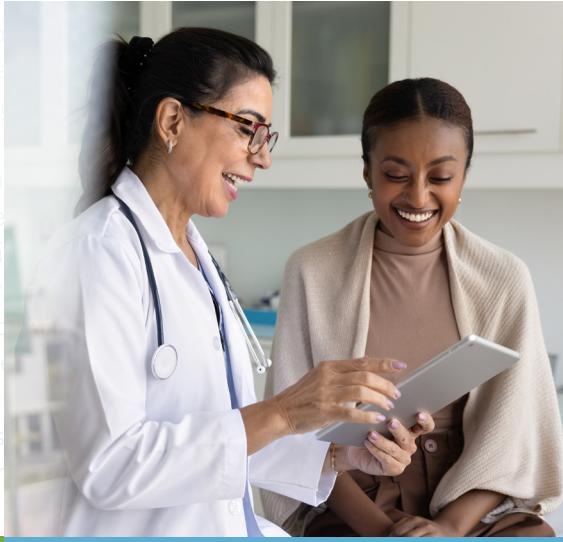

Key Features

- ✓ Full audit trail
- ✓ GDPR-compliant
- ✓ Simple-to-use technology
- ✓ Dedicated support services
- ✓ Real-time video capture confirmation

Unlock the full potential of your GI research with our expertise, tailored imaging solutions, and cutting-edge technology.

Our interdisciplinary team ensures efficient image processing and centralized video assessment, delivering quality outcomes that meet your **unique needs.**

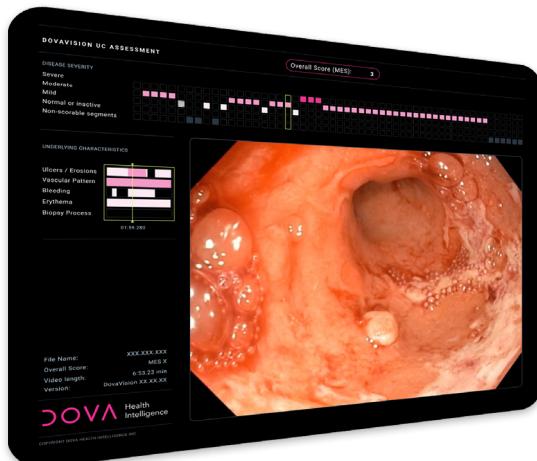

Collaborative Innovations Powered by Virgo & Dova Health Intelligence

Collaborative Innovations Powered by Virgo & Dova Health Intelligence

Propelling Imaging Trial Operations Further

Alimentiv's strategic partnerships with Virgo and Dova Health Intelligence accelerate access to cutting-edge technologies.

AI-Powered Endoscopy Analysis for Actionable Ulcerative Colitis (UC) Insights

DovaVision™ uses advanced AI to automate scoring and rapidly analyze ulcerative colitis disease severity from endoscopy videos. Designed for both research and clinical trials, it ensures enriched, consistent, objective, and efficient evaluation of UC.

Powered by **DOVA** Health Intelligence
Previously **Satisfai Health**

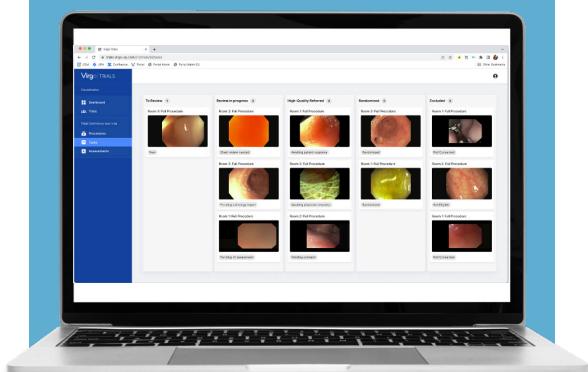

DovaVision™ is not a medical device and is not used by healthcare professionals for clinical decision-making or for the provision of patient care. For research use only (RUO).

Patient Recruitment Enrichment

Further enrich your trial recruitment strategy with **Virgo's** patient recruitment solution:

- ✓ AI-Driven Patient Identification
- ✓ Enroll More Qualified Candidates
- ✓ Reduce Trial Delays
